

Energy Medicine/ Quantum Biofeedback

Dr. Tahmineh Nikookar

Energy Medicine is a form of alternate healing. The Science behind the Energy Medicine system is based on the fact that the body has energy with continuous movement through it, which creates a dynamic energy field. Based on this fact, energetic medicine devices has been developed and are available to be used to help for general health.

One of these devices is called EPFX/SCIO. This is a bio-feedback system that can be used to detect and reduce stress in the body, allowing people to improve their health by using signals from their own bodies.

Stress is the body's response to any demand made upon it and it results in symptoms such as a rise in blood pressure, tightening of muscles, perspiration, and so on. Too much stress can trigger problems with mental and physical health, particularly over a long period of time.

Excess stress is one of the pathways to disease and the EPFX can find energetic imbalances within the body. Biofeedback energetically addresses and balances the physical, mental, emotional and spiritual aspects of the individual. In the process it helps the body to balance and heal itself naturally. It also helps individuals to gain more insight into their own body and current state of energetic health and wellness.

During testing EPFX/SCIO

resonates with thousands of tissues, organs, nutrients, toxins and allergens at biological speeds, which allows practitioners rapidly to detect stressors in the body.

The EPFX connects with the client through a headband, with light wrist and ankle straps which contain sensors. It sends electromagnetic signals to the body, measures and feeds back information between the device and the client. It scans the body much like a virus-scan on a computer. The device works by transmitting electromagnetic

waves through the body, looking for everything from viruses, fungi, minerals, toxin levels, vitamins, nutrients, weaknesses, allergies, abnormalities and food sensitivities, etc. comparing these figures against a "norm", to locate the stress points in the body. It then feeds back its own frequencies to adjust or neutralize destructive wave patterns, therefore it energetically balances the various systems in the body.

The information provided is fundamentally different from that provided by X-rays,

blood tests, etc., because it tells us about the energetic state of the body.

There are many energetic modalities offered on the EPFX for the purpose of balancing the body and relieving stress, such as: Electro Acupuncture, Spinal Therapy, Allergy Desensitizing, Detoxification, etc. With the help of different programs, EPFX also can analyze different issues such as: Emotional blockages, food sensitivities, allergies, vitamin deficiencies, bacteria, fungi, parasites, etc, and according to its analysis suggest natural remedies, including Herbal remedies, homeopathic remedies, and so on.

The EPFX/SCIO is a safe and non-invasive form of

therapy and is especially useful for children, because they are often unable to verbally communicate the site

or degree of their discomfort or pain.
